Space: Issues Concerning the Future Operation of the Space Transportation System: Masad-83-6

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. In this study, GAO reports on the operational responsibilities of the Space Transportation System and presents information on operational issues which must be dealt with in the years ahead by the National Aeronautics and Space Administration (NASA) and for which budgetary decisions will most likely have to be made by Congress. Whether NASA should manage Space Shuttle operations or shift management responsibility to another agency or commercial organization once the shuttle achieves a reasonable degree of maturity will determine whether NASA remains primarily a research and development organization or increases its role in space operations. The delay in a NASA plan to transfer the logistics management of the program to the Kennedy Space Center has raised a question as to whether adequate logistics procedures are being developed and implemented on a timely basis. GAO also had questions about launch and mission control operations. Plans to lease an area near the Kennedy launch site for oil and mineral exploration could increase launch costs and flight safety risks. There is also some question as to whether the current NASA accounting system and procedures...

Reviews

It is fantastic and great. It is written in easy words and phrases instead of confusing. I am just delighted to explain how this is actually the best book I have got read through during my individual life and might be the finest publication for ever.

-- **Prof. Murl Shanahan DDS**

This book will never be easy to start on looking at but quite entertaining to read. It is actually packed with wisdom and knowledge. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Ms. Missouri Satterfield DVM**
