Kluwer Academic Publishers, United States, 1989. Hardback. Book Condition: New. 1989 ed.. 234 x 156 mm. Language: English . Brand New Book ***** Print on Demand *****.In breast cancer as in other cancers on the front line of modern interdisciplinary research we have crossed the threshold of new understanding. Fueled by an awareness that breast cancer is a leading cause of morbidity and mortality in women and honed by rapid technological advances in molecular mechanisms, major inroads into the darkness of this scourge have been accomplished during the past several years. Basic laboratory and clinical research findings must influence and in turn be influenced by efforts to detect, to diagnose and to cure the human disease. It is indeed gratifying to note that the efforts of scientists and clinicians from throughout the world reported in this volume are achieving this objective. The first section of the book focuses on the molecular and genetic basis of breast cancer. The role of specific oncogenes in mammary tumorigenesis using transgenic mice and mammary glands correlating molecular events with specific stages in neoplastic development are described and discussed. Such topics as the nature of specific oncogenes, levels of oncogene expression, the alteration of expression...
