

The Edge Moor Water Tube Boiler General Catalogue (Paperback)

By Edge Moor Edge Moor Iron Company

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: . waste heat instead of by a modern stoker-fired boiler plant the saving of fuel for the 4000-barrel mill should be as follows: Estimated saving of coal per 24-hour day 65 long tons -; . 19,500 long tons It has been estimated that the cement industry in the United States consumes over two and one-half million tons of fuel for power purposes only. Since all or nearly all the power required by cement mills can be generated from the waste heat in the kiln gas, the two estimates given above show that extensive use of waste-heat equipment will go a long way toward solving problems of fuel shortage and conservation, besides producing a considerable reduction in the cost of the manufactured product. Flue from fans, in the low building, to a Cottrell dust separator. Alpha Portland Cement Company, Alsen, N. Y. Representative Installations N every critical...
