

Lecture Notes on O-Minimal Structures and Real Analytic Geometry (Hardback)

Filesize: 6.08 MB

Reviews

The publication is straightforward in study safer to recognize. It is written in straightforward words and never hard to understand. It has been printed in an extremely straightforward way and it is just after I finished reading this book through which basically modified me, affect the way I think.
(Percy Bernhard)

LECTURE NOTES ON O-MINIMAL STRUCTURES AND REAL ANALYTIC GEOMETRY (HARDBACK)

To read **Lecture Notes on O-Minimal Structures and Real Analytic Geometry (Hardback)** eBook, please refer to the link under and save the document or have accessibility to additional information which are relevant to LECTURE NOTES ON O-MINIMAL STRUCTURES AND REAL ANALYTIC GEOMETRY (HARDBACK) ebook.

Springer-Verlag New York Inc., United States, 2012. Hardback. Book Condition: New. 2012 ed.. 236 x 156 mm. Language: English . Brand New Book. This volume was produced in conjunction with the Thematic Program in o-Minimal Structures and Real Analytic Geometry, held from January to June of 2009 at the Fields Institute. Five of the six contributions consist of notes from graduate courses associated with the program: Felipe Cano on a new proof of resolution of singularities for planar analytic vector fields; Chris Miller on o-minimality and Hardy fields; Jean-Philippe Rolin on the construction of o-minimal structures from quasianalytic classes; Fernando Sanz on non-oscillatory trajectories of vector fields; and Patrick Speissegger on pfaffian sets. The sixth contribution, by Antongiulio Fornasiero and Tamara Servi, is an adaptation to the nonstandard setting of A.J. Wilkie's construction of o-minimal structures from infinitely differentiable functions. Most of this material is either unavailable elsewhere or spread across many different sources such as research papers, conference proceedings and PhD theses. This book will be a useful tool for graduate students or researchers from related fields who want to learn about expansions of o-minimal structures by solutions, or images thereof, of definable systems of differential equations.
