In these cases, users may want to etc.), the sample figures should be used within the context consider using derived measures (such as means and of the sampling variability associated with them. medians) or percent distributions. Whether using absolute numbers or derived measures for small population groups For more information on the limitations of 100-percent and for a small number of housing units in small geo-and sample data for persons in group quarters and the graphic areas, users should be cautioned that the sampling classification of group quarters type, see appendix B. error associated with these data may be large. Reasons for the differences between 100-percent and sample totals will be an important focus of post-census Even though the differences between sample estimates research and evaluation. and 100-percent counts for these categories are generally small, the differences for the American Indian, as well as User Note 5 the Hispanic origin populations, are relatively larger than for other groups. The following provides some explanation Estimated population and housing unit totals based on for these differences. tabulations from only the sample questionnaires (sample State-level sample estimates of the number of Ameri-tabulations) may differ from the official counts as...
